## QUIKTAB®

The easy on you,  
easy on the environment  
fast food bagging solution

**We're about to make you and your customers feel really good about your bags.** Everyday, fast food restaurants go through millions of bags. While it's a convenience for customers, all that paper places a strain on your bottom line, storage space and disposal capacity. Too, consumers are becoming more environmentally aware and are looking for ways to reduce the packaging they use. All of which makes now a good time to switch to Hilex Poly's QuikTab bagging solution. Designed as an alternative to #4, 6 and 12 paper bags, QuikTab bags are made of strong, lightweight plastic and feature gusseted sides

that open wide for easy packing of sandwiches and side items. Integrated handles make them easy to carry. Bags dispense one at a time for maximum efficiency at the counter and drive-through lane. As an added benefit, QuikTab bags take up 70 percent less space than paper bags, which helps eliminate storage issues.

QuikTab bags are easy on the environment, reducing solid waste by 80 percent compared to paper bags. This means there is less material to recycle or dispose of once the bags are used. And the more material kept out of landfills, the better!

## The QuikTab bagging system is an easy choice

- Two sizes, two film weights let you match the bag to the purchase
- Gusseted sides for easy packing
- Integrated handles for carry-out convenience
- Custom printing provides branding opportunity (Stock designs also available)
- Increases order accuracy and speed at the point of checkout
- Choose from in-counter, rack and floor stand dispensing systems
- Anytime restocking so there's no need to wait until the dispenser is empty to replenish bags
- Takes up 70 percent less space than comparable number of paper bags
- 80 percent less solid waste than paper bags
